

Lighthorne Parish Council November 2021 Speeding Survey Results

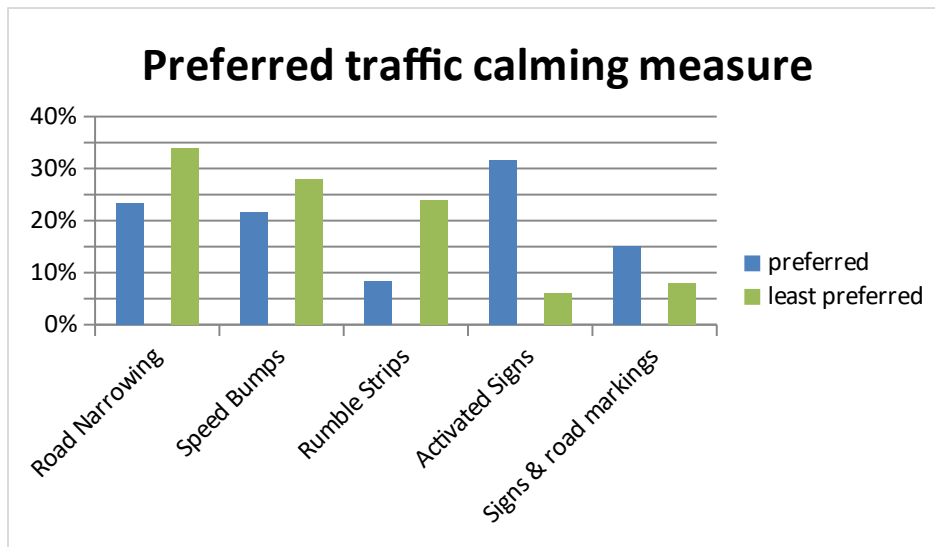

Lighthorne Parish Council (LPC) thanks residents for returning completed speeding survey questionnaires.

The key points from the survey results are

- 43 residents responded
- All residents responding bar one are concerned about speeding traffic through the village
- The vast majority of responders support the use of LPC funds to reduce risk from traffic
- Resident preferences for traffic calming measures are mixed albeit the use of speed activated signs was welcomed by the majority with few citing this as their least preferred option

The results are illustrated in the following charts:

Various additional comments were received, summarised as

- Speeding traffic is causing significant safety issues
- Church Lane and Moreton Morrel lane also suffer from speeding traffic
- Speed limits outside the village should be reduced from 50mph
- The 30mph limit should be reduced to 20mph
- Some concerns about degrading the aesthetic of the village with calming measures
- Some saw road narrowing and speed bumps as the only sure way to reduce speed

LPC next steps

The LPC will be discussing with Warwickshire County Council (the highways authority) residents' concerns with speeding traffic to explore options and processes for implementing traffic calming measures. The results of the survey will be used to evidence concern and to inform a response.

The LPC will keep residents informed of progress and again thanks those who responded.
